

NHS DORSET CLINICAL COMMISSIONING GROUP
PRIMARY CARE COMMISSIONING COMMITTEE
PUBLIC HEALTH DORSET – UPDATE ON LOCALITY WORKING

Date of the meeting	04/04/2018
Author	C Ricketts, Head of Programmes
Purpose of Report	To update Members of the Primary Care Committee on Public Health Dorset's progress in supporting Prevention at Scale work across Localities.
Recommendation	The Committee is asked to note the report.
Stakeholder Engagement	These developments have emerged from discussions about how PAS can become embedded in local communities. There has been engagement with the Joint Public Health Board and both Health and Wellbeing Boards.
Previous GB / Committee/s, Dates	N/A

Monitoring and Assurance Summary

This report links to the following Strategic Principles	<ul style="list-style-type: none"> • Prevention at Scale • Integrated Community and Primary Care Services • One Acute Network • Digitally Enabled Dorset • Leading and Working Differently

I confirm that I have considered the implications of this report on each of the matters above, as indicated	✓		

Initials: CR

1. Update on Locality Working

- 1.1 Following on from the paper in December 2017, this is to update members of the Primary Care Commissioning Committee on Public Health Dorset's support for locality working.
- 1.2 Over the past three months we have assigned 9 members of the public health team to link with specific localities. Arrangements are as follows:

West Dorset: Vicky Abbott	Poole Bay: Michelle Smith
Weymouth and Portland: Fiona Johnson	Bournemouth North: Susan M
North Dorset: Laura Everett-Coles	Bournemouth Central: <i>vacant</i>
Mid Dorset: <i>vacant</i>	Bournemouth East: Jack Blankley
Purbeck: Caoimhe O'Sullivan	East Dorset: <i>vacant</i>
Poole North: Jo Tibbles	Christchurch: <i>vacant</i>
Poole Central: Claire Box	

- 1.3 Two additional members of staff (Catherine Boulton and Sarah Webb) will be assigned to localities by the end of March. This will leave us with two vacancies that we are unable to fill from the existing team. In order to fill the remaining positions, we have submitted a bid to the CCG Transformation Fund with the aim of recruiting to two further part-time staff.
- 1.4 The role of Public Health staff attached to localities involves:
- linking up with key stakeholders within the locality,
 - using various sources of intelligence, to support local planning for Prevention at Scale,
 - highlighting linkages with existing initiatives in other areas,
 - seeking to embed prevention actions within the local transformation plans,
 - evaluating progress, with a particular focus on scale,
 - communicating success and learning across stakeholders and the wider system.
- 1.5 It is still early days in terms of the development of these roles, but our staff have been meeting with stakeholders in the localities, seeking to understand the issues and where there may be opportunities to develop Prevention at Scale.
- 1.6 Since December we have also produced 13 locality profiles. These, together with the relevant slide sets and an interactive locality data dashboard are available through the Public Health Dorset website:
www.publichealthdorset.org.uk/home/intelligence/locality-working

- 1.7 Public Health Dorset has also been providing frameworks and suggested approaches to supporting localities make sense of Prevention at Scale Plans at recent CCG Membership events. This includes using diabetes secondary prevention as an example to show how working at scale and using some of the new investments coming on stream under PAS could have an impact in reducing the number of people not achieving a good level of control or remission.
- 1.8 The proposed work on re-establishing the health checks programme within localities, as part of the changes under the Dorset Integrated Care System, is also a strong example of how localities could build cardiovascular disease prevention at scale into their transformation plans relatively easily. Following the task and finish groups to agree the design and principles, Public Health Dorset link workers will support each locality to develop a clear plan for this work during 2018/19.
