

## The BIG ASK health research project

### Introduction

NHS organisations (NHS Dorset Clinical Commissioning Group (CCG), The Royal Bournemouth and Christchurch Hospitals NHS Foundation Trust, Poole Hospital NHS Foundation Trust, Dorset HealthCare and Dorset County NHS Foundation Trust) commissioned The Market Research Group (MRG) at Bournemouth University to undertake a survey of local residents and users of NHS services.

The main aim of this research was to gather views regarding what patients and residents value from their NHS, as well as identifying what they would like the NHS within Dorset to prioritise. Further aims were to identify areas of improvement, awareness of services available within Dorset, as well as possible changes to services in order to benefit patients and residents. The Big Ask also gathered views from as many different types of respondent as possible in order to determine whether there are any differences in views between various patient groups and residents. This was achieved by data collection and analysis for each of the CCG's 13 localities.

Key areas that the survey asked patients and residents for their views and comments on were:

- Rating of various NHS services available within Dorset
- What residents/patients appreciate about the NHS in Dorset
- What residents/patients would like improved within the NHS in Dorset
- Reasons for attending emergency departments
- Awareness of alternative services to using emergency departments
- What makes a good hospital experience
- Choice of location/provider of health services
- Opening hours of various NHS services
- Availability of specialist staff/care
- Where do people find out information about NHS services and medical conditions

### Methodology

The full Big Ask report analyses and explores the results of the questions and themes above. The fieldwork period was open throughout June – September 2013. The main methodology adopted was quantitative – a self-completion survey, available in both paper format and through online completion with upwards of 25,000 copies sent out via a variety of approaches, including random postal mail-drop, individual NHS partners distribution, accompanied by a media relations plan to drive people to complete online. Some qualitative work was undertaken with ten focus groups comprising a mix of residents across Dorset (these still be analysed). A media relations campaign and partnership with the Bournemouth Daily Echo directed the public to the online survey.

**This report is an abridged version of the full research and summarises findings based on the respondent sample from West Hampshire.**

### Sample size and statistical validity

The target population for the survey was adults living in Bournemouth, Poole, Dorset and West Hampshire aged 16 and over. A total of 6,105 responses were received to the big ask survey. A sample

of 6,105 implies that the results are representative of the Dorset, Bournemouth, Poole and West Hampshire population to within  $\pm 1.25\%$  at the 95% confidence level (i.e. there is only 1 chance in 20 of the margin of error contained within the results being greater than 1.25%).

85% of responses were from Dorset residents, while 7% were from employees of a health care body. Responses were received from residents across all district areas, with 30% of responses from Bournemouth residents and 21% from Poole residents. **There were 290 responses from West Hampshire residents (5%). We do not currently have the demographic breakdown for these responses** (For the overall report, 63% of the respondents were aged older than 65, while 62% were females).

### Weighting

In order for the results to be representative of the wider population, weighting has been applied to the Big Ask data to take into account the differences between the respondent sample and the whole Dorset and West Hampshire population. Weighting involves investigating the demographic data to identify whether a particular sub-group is under-represented within the data. If there are any under-represented sub-groups, weighting involves replicating the data from those in that particular sub-group who did respond in order to simulate the results of the missing sample members. For example, if there is only half the expected number of responses from men aged 16 – 24 when compared to the entire population of Dorset and West Hampshire, this sub-group should be given a weight of 2.0. Likewise, if there are twice as many responses from females aged 45 – 64, then this sub-group should be given a weight of 0.5. Caution should be taken when analysing the weighted data as it assumes that respondents are in all aspects comparable to non-respondents, which may not be the case.

### Net percentage

The net percentage is calculated by adding the two percentages of the two positive options (for example, strongly agree (%) + agree (%)) and then adding the two percentages of the two negative options (strongly disagree (%) + disagree (%)) and then subtracting the negative from the positive. This provides the net percentage figure that allows you to measure the balance of opinion. It also provides you with one percentage that you can then rank against other questions. In most incidences if the net percentage is greater than zero then more respondents are positive than negative, while if the net percentage is a minus figure then more respondents have responded negatively to that question.

### Locality of respondents

Locality	Number of responses	Sample %	Confidence level
Bournemouth North	528	9%	$\pm 4.26$
Central Bournemouth	541	9%	$\pm 4.21$
East Bournemouth	537	9%	$\pm 4.23$
Poole Central	314	5%	$\pm 5.53$
Poole Bay	735	13%	$\pm 3.61$
Poole North	445	8%	$\pm 4.65$
Christchurch	389	7%	$\pm 4.97$
East Dorset	568	10%	$\pm 4.97$
Mid Dorset	294	5%	$\pm 5.72$
North Dorset	324	6%	$\pm 5.44$
Dorset West	218	4%	$\pm 6.64$
Purbeck	271	5%	$\pm 5.95$
Weymouth & Portland	329	6%	$\pm 5.40$
West Hampshire	290	5%	$\pm 5.75$

## Health by locality

	Very good	Good	Fair	Poor	Very poor
Bournemouth North	24%	45%	25%	5%	0%
Central Bournemouth	22%	46%	23%	6%	3%
East Bournemouth	24%	54%	15%	6%	2%
Poole Central	18%	38%	39%	5%	0%
Poole Bay	25%	51%	19%	5%	1%
Poole North	26%	49%	19%	6%	1%
Christchurch	24%	53%	15%	7%	0%
East Dorset	29%	41%	25%	6%	0%
Mid Dorset	26%	54%	15%	5%	0%
North Dorset	36%	43%	14%	7%	1%
Dorset West	21%	50%	24%	5%	1%
Purbeck	30%	42%	23%	5%	0%
Weymouth & Portland	18%	51%	20%	9%	2%
West Hampshire	28%	43%	23%	6%	0%

### Overall respondent profile

Overall, 63% of the respondents were aged older than 65, while 62% were females. Due to this the results have been weighted in order to reflect the whole population of Dorset and West Hampshire.

Just less than three-quarters of respondents rate their health as either very good or good (72%). Only 7% rate their health as poor or very poor. Half the respondents are married (51%) and the vast majority (91%) are heterosexual. The majority of residents have access to a car (89%), while 6% have access to a motorbike.

Just less than one in seven residents (15%) care for someone with long-term ill health or problems related to old age other than as part of their job. Two-thirds of residents (67%) do not have a long-standing illness/disability that affects their daily activities. 63% of residents indicated that they are Christian, 15% have no religion, 11% are atheist and 5% follow another religion / faith / belief. The vast majority of residents are White British (94%)

## SUMMARY OF KEY FINDINGS FOR WEST HAMPSHIRE LOCALITY (IN THE CONTEXT OF THE OVERALL FINDINGS)

Each question in The Big Ask full report provides a narrative of the findings overall for Dorset. This condensed version presents top line figures and themes for West Hampshire region. The West Hampshire responses for each question (in context of answers for the remaining localities) are provided in full in the main body of this document, where West Hampshire is highlighted in orange.

### Top line results emerging from West Hampshire responses (with corresponding page number for more detail)

#### NHS appreciation (page 8)

Caring, skilled staff (35%) time waiting at appointment/being seen quickly (13%), Good GP/surgery practice (15%), Local services (11%) and ambulance/emergency service/999 (11%) are appreciated most by West Hampshire respondents.

#### Areas for improvement in local NHS (page 10)

Appointment times (26%) GP / GP surgery (14%), car parking (14%), NHS 111/NHS Direct (13%) and out of hours/weekend cover (12%) are in need of improvement.

#### Satisfaction with local services (page 11)

86% are satisfied or fairly satisfied with local health services.

#### Use of services in the last 12 months (12)

69% have used outpatients / clinics, 37% inpatients (general), 6% inpatients (community), 74% GP / practice nurse appointment, 14% received treatment at home, 24% used NHS 111, 22% used 999, 5% accessed mental health crisis team.

#### Rating of services (pages 13-17)

West Hampshire residents rated the following as **very good or good**: inpatient at general hospital (84%), community hospital (90%), mental health hospital (81%), outpatient (87%), GP / practice nurse (83%), walk-in centre/ minor injury unit (79%), treatment at home (84%), mental health crisis team (56%) 111 (42%), 999 (92%).

In terms of **poor or very poor** ratings, these were generally very low (under 5%) for the services listed above with the exception of the following: inpatient at a mental hospital (14%), mental health crisis team (33%), 111 (38%)<sup>1</sup>.

#### Awareness of non-emergency services (page 19)

The majority of West Hampshire respondents said they are aware they can access non-emergency treatment via other means than A & E, including GP appointment and telephone consultation (87% / 76%), pharmacy (65%) and 111 (65%). 53% were aware of the out of hours GP service.

---

<sup>1</sup> Media coverage and associated perceptions created as a result were identified in the focus groups as a reason for NHS 111 being regarded as poor, not necessarily on experience.

### **Prepared to use non-emergency services / barriers to using these services (pages 20-28)**

The vast majority West Hampshire respondents appear willing to use a range of other services for non-emergency treatment. However, they highlighted areas which would prevent them from using these services. These are: 71% unaware of walk in centres/minor injury units, prefer face to face consultation (100%), poor reputation / bad publicity of NHS 111 (45%), waiting times on phone (13%) and poor service of out of hours GP (5%), 34% are not aware of any mental health crisis services in the area. It is interesting to note that the national NHS campaign around Choose Well, which distributed leaflets to every household in Dorset in April 2013 to make clear how people can access non-emergency treatment, does not appear to have made much impact. **An issue to feed back to NHS comms teams.**

### **Three most important factors in overnight hospital stay (pages 28-30)**

For West Hampshire respondents these are: quality of clinical care (54%), friendly and helpful staff 39%) and being given a clear explanation of treatment / tests (58%)

### **Three most important factors in day visit (no overnight) (pages 30-32)**

These are: quality of clinical care (56%), being given a clear explanation of their condition (64%), being able to get an appointment quickly (43%)

### **Travelling to hospital (page 33)**

76% travel by car (either as driver or passenger).

### **Choice of care (pages 34-37)**

(67%) of West Hampshire respondents are aware they have a choice of certain routine treatments while 49% are aware they can choose the provider. 83% strongly agree or tend to agree with the statement 'I like to have a choice of who provides my healthcare'. 85% would like 'more information about who provides the service'. 56% agree that they 'would prefer my GP to tell me where to go for treatment', while 85% agreed that they 'like to have a choice of location for treatment'. 55% disagreed that there is 'too much choice'.

### **Factors which influence choice of care (pages 38-39)**

Short waiting time (55%), The reputation of the organisation is also important (60%) reputation of the organisation from your GP or other healthcare professional (57%), short waiting times (55%), clinical reputation of the doctor/clinician (61%) and it is close to where I live (57%).

### **Improvements to local services (pages 40-48)**

In this section, people were asked to comment upon several areas. Seven day working was highlighted with (45%) wanting outpatient services available up to 9pm weekdays, Saturday morning / afternoon (9am-1pm) (41%). 41% also want therapy appointments and scans (45%) and 45% want blood tests available at these times. On average, 32% also want services available on Saturday from 1-5pm. 33% want day case operations in weekday evenings and 44% on a Saturday.

### **Availability of highly skilled staff (page 45)**

95% of West Hampshire respondents cited availability of highly skilled staff available seven days a week as very (77.4%) or fairly important (17.4%).

They strongly agree or tend to agree that they would be prepared to travel further than their local hospital in order to be seen by highly skilled staff seven days a week (84%). (14% disagreed with this.)

### **Specialist care (eg. consultants) (pages 46-48)**

Overall, The Big Ask reveals more respondents disagreed than agreed that they are not prepared to travel further for specialist care. For East Dorset respondents, their answers to specific statements in the questionnaire are as follows:

**I support greater specialist care, even if it may result in having to travel a little further within Dorset** (91% agree/ disagree.) Overall, 82% of all Dorset respondents support this statement.

**I am not prepared to travel further than my local hospital to receive specialist treatment** 13% agree, 75% disagree with this statement).

**I would be happy to travel out of Dorset (eg. Southampton / London) if I require specialist care** (85% agree, 8% disagree).

The specific distance I have to travel to receive specialist treatment is not important to me (33% agree, 18% disagree).

**I would prefer local services to provide a wide range, even if this means less specialist services** 10% agree 33% disagree, and 31% neither agree or disagree).

### **Communication and information (page 49)**

The final question in The Big Ask related to how people find out information about NHS services. 80% of West Hampshire respondents access information via the GP surgery, local print media (24%) or word of mouth (40%).

The qualitative responses from focus groups are currently being analysed and will be available shortly.

## NHS appreciation

Main themes that were identified that residents appreciate about the NHS in Dorset are the attitude and skill of staff, being seen quickly, GP surgeries, the ambulance / emergency service, and services being local.

### Top 5 themes appreciated by locality

---

#### Bournemouth North

Staff (attitude, professionalism, skill, caring) (36%)

Free (23%)

Good GP / surgery practice (18%)

Ambulance / emergency service / 999 (16%)

Local services (16%)

#### Poole Central

Staff (attitude, professionalism, skill, caring) (34%)

Good services / range of services (24%)

On-going / regular treatment (20%)

Local services (12%)

Good GP / surgery practice (11%)

#### Christchurch

Staff (attitude, professionalism, skill, caring) (32%)

Good GP / surgery practice (22%)

Local services (17%)

Time waiting at appointment / being seen quickly (13%)

Free (10%)

#### North Dorset

Time waiting at appointment / being seen quickly (37%)

Staff (attitude, professionalism, skill, caring) (27%)

Good GP / surgery practice (21%)

Local services (13%)

Patient care and treatment (7%)

#### Central Bournemouth

Staff (attitude, professionalism, skill, caring) (31%)

Good GP / surgery practice (21%)

Ambulance / emergency service / 999 (17%)

Time waiting at appointment / being seen quickly (13%)

Patient care and treatment (12%)

#### Poole Bay

Staff (attitude, professionalism, skill, caring) (42%)

Local services (17%)

Time waiting at appointment / being seen quickly (15%)

Patient care and treatment (13%)

Good GP / surgery practice (13%)

#### East Dorset

Staff (attitude, professionalism, skill, caring) (39%)

Good GP / surgery practice (20%)

Time waiting at appointment / being seen quickly (19%)

Ambulance / emergency service / 999 (14%)

Local services (12%)

#### Dorset West

Staff (attitude, professionalism, skill, caring) (30%)

Good GP / surgery practice (30%)

Local services (20%)

Minor injury unit / walk in centre (14%)

**West Hampshire**

Staff (attitude, professionalism, skill, caring) (35%)  
Good GP / surgery practice (15%)  
Time waiting at appointment / being seen quickly (13%)  
Local services (11%)  
Ambulance / emergency service / 999 (11%)

---

The themes highlighted in yellow indicate themes that appear in the top five themes that are most appreciated by locality but do not appear in the top five of the overall sample

## NHS improvement

Dorset residents would most like appointment times within the NHS improved, including having to wait to get an appointment with their GP as well as waiting for an appointment once referred. Residents would also like their GP surgery to improve, with longer opening hours and availability at weekends covered. Residents also feel that there is not enough NHS staff, particularly in hospitals.

### Top 5 themes that are in need of improvement by locality

---

#### **Bournemouth North**

Appointment times (44%)

GP / GP surgery (14%)

Attitude of staff / professionalism / skill / knowledge (11%)

More staff/nurses are overworked/less agency staff (9%)

Patient care and treatment (8%)

#### **Poole Central**

Appointment times (29%)

Accessibility (22%)

Availability (21%)

Preventative care (20%)

GP / GP surgery (12%)

#### **Christchurch**

Appointment times (46%)

After care / follow up (22%)

Discharge from hospital (21%)

GP / GP surgery (18%)

More staff/nurses are overworked/less agency staff (14%)

#### **North Dorset**

GP / GP surgery (22%)

Appointment times (22%)

Out of hours / weekend cover (15%)

Local services (10%)

Accessibility (9%)

#### **Central Bournemouth**

Appointment times (29%)

GP / GP surgery (17%)

Out of hours / weekend cover (16%)

Communication / clear explanation / advice (9%)

A & E (9%)

#### **Poole Bay**

Appointment times (40%)

GP / GP surgery (18%)

Out of hours / weekend cover (8%)

Car parking (6%)

NHS Dentists (6%)

#### **East Dorset**

Appointment times (39%)

GP / GP surgery (21%)

Patient care and treatment (16%)

Out of hours / weekend cover (9%)

Communication / clear explanation / advice (8%)

#### **Dorset West**

Appointment times (37%)

GP / GP surgery (20%)

More staff/nurses are overworked/less agency staff (13%)

Car parking (11%)

#### **East Bournemouth**

Appointment times (47%)

Patient care and treatment (20%)

GP / GP surgery (15%)

Increase staff salary (15%)

More staff/nurses are overworked/less agency staff (10%)

#### **Poole North**

Appointment times (39%)

More staff/nurses are overworked/less agency staff (14%)

GP / GP surgery (13%)

Patient care and treatment (9%)

Out of hours / weekend cover (9%)

#### **Mid Dorset**

Appointment times (29%)

GP / GP surgery (14%)

Communication / clear explanation / advice (13%)

Car parking (10%)

More staff/nurses are overworked/less agency staff (9%)

#### **Purbeck**

Appointment times (31%)

GP / GP surgery (24%)

Out of hours / weekend cover (17%)

Community Hospital (11%)

Local services (10%)

Out of hours / weekend cover (9%)

---

**Weymouth & Portland**

Appointment times (32%)

GP / GP surgery (15%)

Patient care and treatment (12%)

Mental health services (12%)

More staff/nurses are overworked/less agency staff (8%)

**West Hampshire**

Appointment times (26%)

GP / GP surgery (14%)

Car parking (14%)

NHS 111 / NHS Direct (13%)

Out of hours / weekend cover (12%)

---

The themes highlighted in yellow indicate themes that appear in the top five themes that are most in need of improvement by locality but do not appear in the top five of the overall sample

### Satisfaction with health services

The majority of residents are either 'fairly satisfied' (48%) or 'very satisfied' (36%) with health services in Dorset in general.

### Satisfaction with health services in Dorset by locality

	Very satisfied	Fairly satisfied	Neither satisfied nor dissatisfied	Fairly dissatisfied	Very dissatisfied	Net satisfaction
Bournemouth North	31.1%	53.6%	8.6%	5.7%	0.9%	<b>+78.1%</b>
Central Bournemouth	33.8%	44.9%	9.7%	7.7%	3.8%	<b>+67.2%</b>
East Bournemouth	41.1%	42.9%	7.3%	4.8%	3.9%	<b>+75.3%</b>
Poole Central	26.2%	64.8%	6.4%	1.7%	0.9%	<b>+88.4%</b>
Poole Bay	39.1%	48.4%	8.7%	2.2%	1.5%	<b>+83.8%</b>
Poole North	31.4%	56.1%	7.0%	3.6%	1.9%	<b>+82.0%</b>
Christchurch	34.0%	36.5%	5.4%	23.3%	0.9%	<b>+46.3%</b>
East Dorset	36.0%	49.2%	10.3%	3.2%	1.4%	<b>+80.6%</b>

### NHS services used and rating of services

The majority of residents have had or know someone that has had a GP appointment (90%) in the last 12 months, while just less than three-quarters (71%) have or know someone that has been an outpatient at a hospital. One-quarter of residents have used NHS 111 or know someone that has (26%).

Users of services were more likely to offer an opinion on how they would rate each service than those that had not used the service. Of those that did offer an opinion on services, 999 ambulance services and outpatients at a hospital received the highest net rating of all services (+90% and +80% respectively), while NHS 111 (+11%) and mental health crisis services (+11%) received the lowest net ratings.

## Services used by locality

Services used in Dorset within the last 12 months is analysed by locality.

	Inpatient at a general hospital	Inpatient at a community hospital	Inpatient at a mental health hospital	Outpatient at a hospital (clinics)	GP / practice nurse appointment	Walk in centre / minor injury unit	Treatment received at home	Mental health crisis services	NHS 111 telephone service	999 ambulance services

## Service rating by locality

The following tables report on the findings of those that offered an opinion for each respective service.

### Inpatient at a general hospital

	Very good	Good	Neither good nor poor	Poor	Very poor	Net rating
Bournemouth North	22.0%	53.9%	14.6%	8.8%	0.6%	<b>+66.5%</b>
Central Bournemouth	28.5%	50.0%	13.6%	7.1%	0.9%	<b>+70.5%</b>
East Bournemouth	38.0%	43.4%	11.0%	6.1%	1.5%	<b>+73.8%</b>
Poole Central	33.4%	55.3%	8.3%	2.6%	0.4%	<b>+85.7%</b>
Poole Bay	25.7%	55.7%	13.2%	4.9%	0.5%	<b>+76.0%</b>
Poole North	25.4%	58.7%	8.9%	6.8%	0.2%	<b>+77.1%</b>
Christchurch	22.7%	60.9%	7.7%	8.5%	0.2%	<b>+74.9%</b>
East Dorset	24.2%	49.5%	17.1%	5.8%	3.4%	<b>+64.5%</b>
Mid Dorset	26.2%	57.9%	10.7%	3.6%	1.5%	<b>+79.0%</b>
North Dorset	29.4%	45.3%	20.4%	3.4%	1.6%	<b>+69.7%</b>
Dorset West	27.4%	54.2%	11.4%	5.7%	1.4%	<b>+74.5%</b>
Purbeck	18.2%	57.0%	20.1%	4.0%	0.7%	<b>+70.5%</b>
<b>Weymouth &amp; Portland</b>	<b>26.7%</b>	<b>54.3%</b>	<b>9.4%</b>	<b>9.3%</b>	<b>0.2%</b>	<b>+71.5%</b>
West Hampshire	37.2%	46.4%	9.5%	4.7%	2.2%	<b>+76.7%</b>

### Inpatient at a community hospital

	Very good	Good	Neither good nor poor	Poor	Very poor	Net rating
Bournemouth North	19.9%	48.6%	30.6%	0.0%	1.0%	<b>+67.5%</b>

## Emergency department

More than half the residents (53%) have used or know someone that has used an emergency department in Dorset in the last 12 months. Emergency departments received a net rating of +67% overall. Three-quarters of emergency department users indicated that they attended because it was an emergency (75%). Just less than one-fifth of users indicated that they attended A&E because they were referred there by a GP (18%), and a further 15% indicated that they attended because their GP surgery was closed.

### Emergency department use in the last 12 months by locality

	Yes, I have	Yes, a friend / relative has	Yes, I am the carer of someone who has	No
Bournemouth North	20%	34%	4%	48%
Central Bournemouth	35%	30%	6%	42%

## Awareness of non-emergency treatment services

The majority of respondents are aware that they can receive non-emergency treatment via a GP appointment (89%), while more than two-thirds of respondents are aware of being able to receive non-emergency treatment via a GP telephone consultation (70%). Only 15% of respondents are aware of mental health crisis services, while less than one-third are aware of being able to use the NHS Choices website as a source of non-emergency treatment (30%).

East Bournemouth residents are significantly less likely to be aware of GP telephone consultations than residents in any other locality. Weymouth & Portland and North Dorset residents are significantly more likely to be aware of walk in centres / minor injury units than residents in any other locality.

## Awareness of non-emergency treatment services by locality

## Prepared to use services for non-emergency treatment

The vast majority of respondents (92%) would be prepared to have a GP appointment for non-emergency treatment, while three-quarters would be prepared to have a GP telephone consultation (75%). More than two-thirds of respondents would be prepared to use a pharmacist (69%) or visit a walk in centre / minor injury unit (68%). Only one-third of respondents would be prepared to use the NHS Choices website (35%) for non-emergency treatment.

## Prepared to use for non-emergency treatment by locality

## What would prevent residents from using services - general comments section (this was a free text field)

These responses were then coded in to each service that the comment was relevant to and then coded again to provide themes. Where comments were not specific about which service they referred to they have been grouped as general comments that would prevent service use.

More common comments that were made included a lack of awareness of services, not wanting to be treated by unqualified staff, a preference for a more personal service/face-to-face consultation, the severity of the condition needing treatment, and the distance from home of the service.

## GP appointment

More than three-fifths of the comments that related to what would prevent respondents from using a GP appointment for non-emergency treatment related to having difficulty getting an appointment (62%), while a further 14% referred to the availability of a GP. Just less than one-fifth of the comments referred to a preference to see their own GP for an appointment (19%).

### Reasons for not using a GP appointment by locality

	Prefer to see my own GP	Difficulty getting a GP appointment	GP availability	Busy GP surgery	Local services	Patient care	Confidence in GP / good service	Wasting GP time	Other

### Day visit to hospital (no overnight stay)

When considering what is important in relation to a day visit to hospital (no overnight stay), being given a clear explanation of their condition (57%) was the factor that most respondents indicated was in their top three factors, followed by the quality of clinical care (48%) and being able to get an appointment quickly (45%).

Top three most important factors regarding a day visit to hospital by locality

**Bournemouth North**

Able to get an appointment quickly (57%)  
 Being given a clear explanation of your condition (55%)  
 Quality of clinical care (44%)

**Poole Central**

Being given a clear explanation of your condition (62%)  
 Able to get an appointment quickly (59%)  
 Quality of clinical care (45%)

**Christchurch**

Being given a clear explanation of your condition (51%)  
 Being given a clear explanation of any further treatment / medication (51%)  
 Able to ask questions about treatment (51%)

**North Dorset**

Being given a clear explanation of your condition (63%)  
 Quality of clinical care (60%)  
 Being given a clear explanation of any further treatment / medication (47%)

**Weymouth & Portland**

Being given a clear explanation of your condition (57%)  
 Able to get an appointment quickly (49%)  
 Quality of clinical care (46%)

**Central Bournemouth**

Being given a clear explanation of your condition (56%)  
 Quality of clinical care (49%)  
 Being given a clear explanation of any further treatment / medication (41%)

**Poole Bay**

Being given a clear explanation of your condition (58%)  
 Able to get an appointment quickly (51%)  
 Quality of clinical care (51%)

**East Dorset**

Being given a clear explanation of your condition (56%)  
 Quality of clinical care (49%)  
 Able to get an appointment quickly (48%)

**Dorset West**

Being given a clear explanation of your condition (55%)  
 Quality of clinical care (48%)  
 Able to get an appointment quickly (46%)

**West Hampshire**

Being given a clear explanation of your condition (64%)  
 Quality of clinical care (56%)  
 Able to get an appointment quickly (43%)

**East Bournemouth**

Being given a clear explanation of your condition (62%)  
 Quality of clinical care (45%)  
 Being given a clear explanation of any further treatment / medication (44%)

**Poole North**

Being given a clear explanation of your condition (59%)  
 Able to get an appointment quickly (49%)  
 Quality of clinical care (49%)

**Mid Dorset**

Being given a clear explanation of your condition (52%)  
 Quality of clinical care (46%)  
 Able to get an appointment quickly (46%)

**Purbeck**

Quality of clinical care (59%)  
 Being given a clear explanation of your condition (55%)  
 Able to get an appointment quickly (45%)

Importance of factors relating to day visits to hospital (no overnight stay) by locality

	Able to ask questions about treatment	Able to get an appointment quickly	Being given a clear explanation of any further treatment / medication	Being given a clear explanation of your condition	Friendly and helpful staff	Quality of clinical care	Short time spent in the waiting room	Tests results being received by your GP quickly	Other

## Influence on choice of treatment provider / location

High influence levels were reported for convenient time and date of appointment, recommendation of the organisation from a GP, the reputation of the organisation, short waiting times, close to home, reputation of the doctor, and previous experience / knowledge of the organisation. Being close to the place of work and the service being located in a hospital has the least influence.

### Top five 'very influential' factors regarding choice of where to go for a routine appointment (no overnight stay) by locality

#### Bournemouth North

Convenient time and date of appointment (61%)

Short waiting times (58%)

It is close to where I live (56%)

The reputation of the organisation (49%)

Clinical reputation of the doctor / clinician (47%)

#### Poole Central

It is close to where I live (63%)

Convenient time and date of appointment (57%)

Recommendation of the organisation from your GP or other health care professional (56%)

The reputation of the organisation (56%)

Previous experience / knowledge of the organisation (53%)

#### Christchurch

Clinical reputation of the doctor / clinician (63%)

The reputation of the organisation (59%)

Recommendation of the organisation from your GP or other health care professional (56%)

Previous experience / knowledge of the organisation (49%)

It is close to where I live (46%)

#### North Dorset

The reputation of the organisation (64%)

Clinical reputation of the doctor / clinician (58%)

Recommendation of the organisation from your GP or other health care professional (55%)

It is close to where I live (44%)

Convenient time and date of appointment (43%)

#### Weymouth & Portland

Convenient time and date of appointment (60%)

#### Central Bournemouth

It is close to where I live (58%)

The reputation of the organisation (58%)

Convenient time and date of appointment (57%)

Clinical reputation of the doctor / clinician (51%)

Recommendation of the organisation from your GP or other health care professional (49%)

#### Poole Bay

It is close to where I live (55%)

The reputation of the organisation (54%)

Convenient time and date of appointment (53%)

Clinical reputation of the doctor / clinician (53%)

Recommendation of the organisation from your GP or other health care professional (51%)

#### East Dorset

The reputation of the organisation (62%)

Clinical reputation of the doctor / clinician (59%)

Recommendation of the organisation from your GP or other health care professional (51%)

Previous experience / knowledge of the organisation (49%)

It is close to where I live (49%)

#### Dorset West

The reputation of the organisation (55%)

Clinical reputation of the doctor / clinician (55%)

It is close to where I live (53%)

Recommendation of the organisation from your GP or other health care professional (52%)

Convenient time and date of appointment (50%)

#### West Hampshire

Clinical reputation of the doctor / clinician (61%)

#### East Bournemouth

Convenient time and date of appointment (63%)

Short waiting times (53%)

It is close to where I live (52%)

Recommendation of the organisation from your GP or other health care professional (52%)

The reputation of the organisation (49%)

#### Poole North

The reputation of the organisation (61%)

It is close to where I live (57%)

Convenient time and date of appointment (52%)

Clinical reputation of the doctor / clinician (50%)

Short waiting times (50%)

#### Mid Dorset

It is close to where I live (60%)

Convenient time and date of appointment (59%)

Clinical reputation of the doctor / clinician (56%)

The reputation of the organisation (55%)

Recommendation of the organisation from your GP or other health care professional (50%)

#### Purbeck

It is close to where I live (54%)

The reputation of the organisation (49%)

Convenient time and date of appointment (51%)

Previous experience / knowledge of the organisation (49%)

Clinical reputation of the doctor / clinician (55%)

---

It is close to where I live (57%)

Short waiting times (53%)

The reputation of the organisation (52%)

Previous experience / knowledge of the organisation (50%)

The reputation of the organisation (60%)

Recommendation of the organisation from your GP or other health care professional (57%)

It is close to where I live (55%)

Short waiting times (55%)

---

The factors highlighted in yellow indicate factors that appear in the top five most influential factors by locality but do not appear in the top five of the overall sample

## Seven day working

At least three-fifths of residents feel that additional opening hours are necessary for all services mentioned. Weekday evenings (5pm-9pm) and Saturday mornings (9am-1pm) are the two most popular additional opening hour time slots for all services mentioned.

### Outpatient clinics additional opening hours by locality

## Communication and information

7% of respondents indicated that they do not know how to find out about NHS services in Dorset. More than four out of every five respondents currently find out information about NHS services through their GP surgery (81%), while nearly half the respondents find out information through word of mouth (48%). One-third of respondents use printed local media (34%) and the NHS Choices website (32%).

More than two-thirds of respondents indicated that they undertake a general search on the internet (69%) when finding out information about a medical condition, while just less than half would phone their GP surgery (46%). More than two-fifths of respondents would use the NHS Choices website (42%). Just less than one-fifth would phone NHS 111 (18%).
